

Protecting and enriching the learning experience

IT professionals are considering innovative and cost-effective ways to deliver flexible computing resources to more students.

Challenges

48 states are spending less per student today than they did before 2008.

20%

34 states cut higher education funding by more than **20%**.

33%

11 states cut higher education funding by more than **33%**.

Educators must find solutions to...

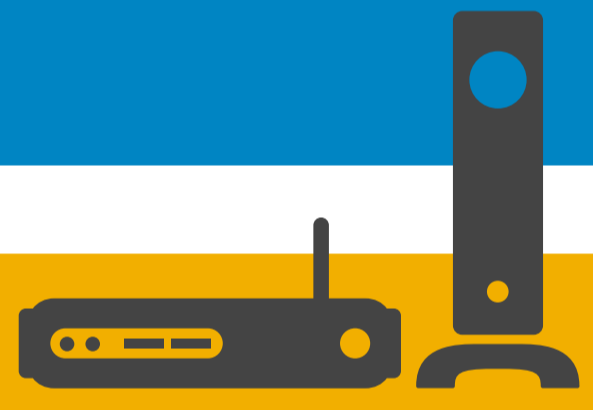

- ★ Provide every student distance learning in underserved institutions.
- ★ Provide every student a modern learning experience with access to collaborative applications such as Google Apps for Education.
- ★ Protect student and research data as well as standardized tests.

Data examples based on US market research

Solution

VDI and Dell Wyse thin clients enable...

Stronger security

Centralized storage means reduced risk of data loss or theft, security built for every user.

Superior experience

Enhanced student and teacher productivity, quick deployment, tech use in learning programs.

Saving time and money

Cut operational costs, fast provisioning, maximized software licenses, lower energy consumption.

Benefits

Protected student data

Encrypted data, virus-immune endpoints protect student and research on and off campus.

Dynamic learning

Superior high-performance desktop experience for broad range of use from labs to distance learning.

Reduced expenses

Reduce capital and operating expenses to help schools maximize tight budgets.
